Dear Parent/Carer

Unfortunately due to COVID-19 restrictions we were unable to carry out your child's health review, which includes vision, hearing, height and weight screening in line with the National Child Measurement Programme (NCMP), whilst they were in Reception class.

At the beginning of your child's Reception year you were given a health questionnaire to complete. If you have any concerns related to this or would like us to complete your child's review of hearing, height and weight, please contact us as soon as possible via email on nem-tr.romfordsn@nhs.net and we will arrange a suitable appointment date and time.

For this catch-up programme, appointments will be offered outside of school hours. This will include during half term week when they will be offered on a first come first served basis. Please note that all appointments will be carried out with appropriate infection prevention and control measures in place as we continue to protect against COVID-19.

Please note we are unable to see children for vision screening after the Reception year, however if you are concerned please book an appointment for them with an optician of your choice.
